The University of New Mexico Comprehensive Cancer Center (UNMCCC) is seeking a motivated, enthusiastic, and detail-oriented graduate student to join our team as a graduate research assistant (GRA). The GRA will work on a home-based intervention that utilizes a whole-of-day approach to physical activity in older cancer survivors. The clinical trial will evaluate whether a Fitbit activity tracker plus health coaching can help older cancer survivors to be more active throughout the day, every day. The study is scheduled to launch this summer (2022). There are two GRA positions for 1 year at 20 hours per week. Compensation includes a stipend, health insurance, tuition, and fees.

**Role and responsibilities**
- Recruit study participants
- Provide health coaching to study participants
- Data collection and data entry
- Attend project meetings
- Other research activities to support the project

**Minimum Qualifications**
- Bachelor’s degree
- Strong interpersonal and communication skills
- Detail-oriented

**Preferred Qualifications**
- Research experience with clinical or community-based research studies
- Experience with recruitment of study participants
- Experience with health promotion

**To Apply:**
Positions for summer 2022 through fall semester 2023 are available. If interested, please email your resume and a cover letter to Claire Pestak at clpestak@salud.unm.edu.
