Job Title: Student Research Assistant

Mentor: Jessica Reno

Organizational Code: 852Q

Assignment Start Date: ASAP

Assignment End date: December 18, 2021

Labor Distribution Index: 100% from 253011

Appointment Percent: 25-50% (10-20 hours per week)

Brief Description of Duties: The Student Research Assistant will work in the Department of Internal Medicine’s Division of Epidemiology, Biostatistics, and Preventive Medicine to participate in the design and implementation of an online clinical research training curriculum for medical residents and fellows at the University of New Mexico School of Medicine. This 2-year project is a scholarly research project funded by the UNM School of Medicine to develop an innovative training curriculum adapted to meet the individual need of residents and fellows. The Assistant will have opportunities to learn about online instruction design, research evaluation methodology, and research project implementation and management, which are skills proven to be highly demanded in the workplace. The Assistant also will have the opportunity to co-author research publication(s).

The job responsibilities will include:

- Managing the online pre- and post-training assessments in REDCap
- Analyzing results of the online assessments
- Conducting search, reviews, and organization of existing online clinical research curriculum
- Contributing to the ongoing creation of curriculum
- Managing the Moodle online course site
- Monitoring discussions among trainees online
- Other duties as needed – other research projects are ongoing

Minimum requirements:

- >2 years of college study in a quantitative or health-related field
- Eligibility to work on campus
- Bachelor’s degree, current work towards a graduate degree

Preferred requirements:

- Experience in basic data management
- Experience using software such as SAS or R
- Working knowledge of REDCap
- Excellent communication skills
