Department offering this position: Department of Special Education-Grant Funded

Position title: Research Assistant in Applied Behavior Analysis

This position (choose one option)
- Is open until filled

Position description:
Research Assistant sought to support a one year funded project aimed at investigating the prevalence and perception of Adverse Childhood Experiences in a diverse community. Information from this study shall inform training on Trauma-Informed Classroom Management in the state of New Mexico. We welcome application from students pursuing advanced degrees in education, social sciences, psychology, or related fields who have relevant training and experience, interest in working with a research team, and strong interest in trauma-informed care and behavior management.

Position duties and responsibilities include:
- Supporting dissemination of survey materials
- Reviewing survey responses and cleaning data prior to analysis
- Supporting literature reviews through searching databases and combing through data
- Supporting training opportunities such as gathering materials, sending invites, facilitating remote training opportunities
- Managing research materials
- Attending and facilitating meetings with community-based individuals

Requirements for consideration:
1) Enrolled in a graduate program in the education, social sciences, psychology or related field of study.
2) Strong interpersonal and writing skills.
3) Training and/or experiences with conducting literature searches.
4) Training and/or experience in survey methods (preferred, but not required.)

Pay will be $16-18/hr., depending on graduate program status, with a commitment of 8-10 hours/week.

Required application materials:
Please send a cover letter and resume, listing three reference names, to oterot@unm.edu
The position is open until filled.
